Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's representatives describe the novelty aspect of the invention and showed how it has distinguished over the references used, especially regarding how the token stream is processed in order to yield a code count. Examiner has pointed out this most crucial aspect is not being claimed sufficiently to put forward such alleged distinguishing feature; and it has been decided that the next amendments by Applicant to the claims would be more specific as to overcome *inter alia* the Examiner's above concern about the breadth of the claim.
